

IBS-Parts Cleaning Device Type G-50-I

Description Device closed in industrial design, compact and stable design.

Article-No. 2120008

Brief info load & tank capacity

Function By pressing the foot switch the self priming IBS-Special Pump moves the cleaner from the drum through the hose to the brush. During the manual cleaning process fresh liquid is flowing out and the soiled liquid flows back into the drum. The heavy dirt particles fall down to the bottom of the drum. The pump sucks fresh cleaning agent from the middle of the barrel. An extended service life of the special cleaner is ensured. The drum with the dirty liquid is simply replaced with a drum containing fresh IBS-Special Cleaning Agent.

Advantage

- ideal for use in every repair shop or maintenance department
- with increased load capacity
- compact and stable
- ergonomic construction
- 3 years warranty for device and pump when used in combination with IBS-Special Cleaning Agents

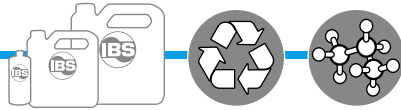

Optional accessories Collecting Tray 2120021

Technical Data	Overall dimensions:	800 x 500 x 1100 mm
	Work surface:	790 x 490 mm (inside dimensions)
	Work height:	895 mm
	Load capacity:	150 kg
	Max. container size:	50 liter barrel
	Power connection:	230 V, 50 Hz
	Weight (without barrel):	40 kg
