

# IBS-Special Cleaner RF

## Description

Ideal for applications requiring the treated work pieces to be left covered with a light oil film. As a result of the slow evaporation, the cleaner solvent also will provide a temporary corrosion protection to the work pieces.

## Areas of application

Production and maintenance departments of industry and manufacturing, repair-, service and maintenance workshops, agricultural machinery-, construction machinery-, forklift truck-, truck- respectively automobile workshops, mechanical engineering and tool construction.

For the commercial use as solvent for the industrial parts cleaning and surface degreasing.

## Application benefits

- excellent cleaning effect — easy removal of stubborn oil and grease soiled parts
- even evaporation — evaporation number VZ 550 (Ether = 1)
- leaves a light oil film, no metal corrosion, application-related with temporary corrosion resistance
- odour — mild, generic
- for all court surfaces
- disaromatised
- no electrical conductivity — puncture of voltage > 70 kV/cm, dry up to 200kV/cm
- classification according to BetrSichV (German Health and Safety at Work Regulations) — none
- flashing point — 61°C
- several approvals available
- pH-value — water-based extract neutral

## Environment / Disposal

IBS Scherer GmbH is registered as a waste management facility according to § 52 paragraph 1 KrW/AbfG (Life Cycle Management Law / Waste Management Law) with the waste management agencies in all federal states. In the IBS disposal cycle, the used IBS special cleaning agent (junk goods) can be returned upon delivery of a new drum.

With skin health assessment! Skin friendliness — independent report on skin-friendliness is available.

This IBS-Special Cleaner was distinguished with the stamp of quality „Low Emission Product“ by the BG ETEM.
