

IBS-Special Cleaner Securool

Description

Hydrocarbon mixture based on vegetable oil esters. No subject to the VOC guideline!
For the cleaning of work pieces which will not be treated afterwards (paint work, adherence...), for example in maintenance departments of the industry as well as in general workshops.

Areas of application

For maintenance departments of the industry, as repair shops of all kind, road maintenance depots, construction industry, steel industry and preservation.

For the commercial use as solvent for the industrial parts cleaning and surface degreasing.

Application benefits

- Cleaning efficiency — excellent for very tough oil and grease contaminations
- Evaporation — slow and uniform (interim storage possible for several days)
- Residues — the residual oil film ensures a temporary rust protection
- Odour — very mild
- The VOC guideline does not apply.
- Electrical conductivity — low, breakdown voltage >70 kV/cm, dried up to 200 kV/cm
- Classification according to BetrSichV (German Health and Safety at Work Regulations) — none
- Flashing point - > 101°C
- pH value — aqueous extract neutral

Environment / Disposal

IBS Scherer GmbH is registered as a waste management facility according to § 52 paragraph 1 KrW/AbfG (Life Cycle Management Law / Waste Management Law) with the waste management agencies in all federal states. In the IBS disposal cycle, the used IBS special cleaning agent (junk goods) can be returned upon delivery of a new drum.

With skin health assessment! Skin friendliness — independent report on skin-friendliness is available.
