

Prototyping resin

New

PRF100

Polyurethane casting resin dedicated to the realization of parts that can be placed in contact with food.

APPLICATIONS :

Any need for parts that have to comply to the European Directives : 10/2011 and 1935/2004 article 3, decree 2007/766 for a long contact with dry, humid and greasy (meat, fish) food, clear and cloudy drinks, alcoholic beverages of an alcoholic strength below 20%.

ADVANTAGES :

- Food contact compliant
- Transparent and colorable (not UV stable)
- High impact resistance
